Nobody Knows Cleaning For Oil, Gas & Mining Like Hotsy Carlson!

We've been Pressure Washer Specialists to the Oil, Gas & Mining Industry since 1974

- Choose from over 100 hot or cold water pressure washers - we also have equipment suitable for oil rigs. Electric and diesel fired units that meet safety requirements.
- No open flame. Much SAFER to use than a traditional diesel fired burner. ETL Certified to UL-1776 safety standards
- No need to cool the heating coil down when finished using
- Enclosed cabinet design to keep end users from tampering with components
- Very little maintenance required, unlike traditional diesel fired pressure washers. Oil Field Ready.
- Heavy angle iron frame and chassis; durable powder coat paint resists years of corrosion and rugged use

Hotsy pumps carry a 7-year warranty and a 5-year heater coil warranty. All Hotsy models are ETL-Certified to rigid UL-1776 safety standards.

Nothing Cleans Like a Hotsy!

**Nothing Cleans
Like a Hotsy!**

Hotsy's HWE Series All Electric Hot Water Pressure Washers are ideal for the oil industry

Motor and pump are mounted on a **Power Platform** with four vibration isolators to minimize shaking and stress on the frame.

With the switch in the 'ON' position, the **Auto Start** function allows the unit to be turned on with the pull of the trigger for convenient remote operation.

50 ft. of double-wire braid **High Pressure Hose** rated for up to 5800 PSI and with 24-inch **Hose Guard** for burst protection and swivel **Crimp Fitting** for tangle-free handling of hose and trigger gun.

Easy-to-attach **detergent Injector** for easy soap application.

Heavy-duty **Upper and Lower Cabinet** is protected by an epoxy powder coat finish.

Inlet Filter strainer protects pump from debris.

Contains nine high-efficiency **Heating Elements** that do not come in contact with the pressurized water, resulting in reduced scale build up, lower maintenance, and longer life.

Water is heated in a **Stainless Steel Coil** submerged in a tank of water solution for efficient heat transfer and instant hot water with the pull of the trigger; a **Layer of Oil** rests on the surface of the tank water solution for additional retention of heat and to prevent evaporation.

SPECIFICATIONS

MODEL	GPM	PSI	HP	MOTOR	AMPS	VOLT / PH	BTU / HOUR	PUMP	DRIVE	HOSE	SHIP WT (lbs)
HWE-4020C	3.9	2000	6.2	Baldor	55.2	460/3	138,308	Hotsy Triplex	Belt	50'	620
